For years, the media and the U.S. government have repeated a familiar refrain: that the regime of now-ailing Venezuelan strongman Hugo Chavez, however annoying, poses no serious threat to the national security of the United States. Compelling evidence, however, suggests otherwise. Under Chavez, Venezuela has systematically opposed U.S. values and initiatives throughout the Western Hemisphere and the world in general. It has tried to influence political events in other Latin American countries, sometimes successfully. It has supported guerrilla movements and terrorist organizations in other countries (most notably Colombia). And it has facilitated the activities of drug traffickers active in the region, even as it has destabilized the regional status quo through massive military purchases.

The most dangerous threat to the U.S. from Venezuela, however, results from its facilitation and encouragement of the penetration of the Western Hemisphere by the Islamic Republic of Iran. Since 2005, with Venezuela’s assistance, Iran has created an extensive regional network of economic, diplomatic, industrial and commercial activities, with significant effect. The sum total of Iran’s declared investments in the region now stands at some $20 billion, at a time when the Iranian economy itself is in exceedingly poor condition. The depths of Iran’s involvement in the Western Hemisphere are all the more surprising—and significant—given that there is no historical or cultural affinity whatsoever between Iran and the countries on this side of the Atlantic. Nevertheless, the Iranian regime in recent years has exhibited an unprecedented level of interest and involvement in the region, facilitated by its burgeoning strategic partnership with Caracas.

HOW CARACAS HELPS TEHRAN

The most visible and pervasive feature of Iran’s regional presence stems from its extensive web of economic contacts, using Venezuela as a beachhead. In April of 2009, Iranian President Mahmoud Ahmadinejad and Venezuelan President Hugo Chavez met in Tehran and inaugurated a binational Iranian-Venezuelan development bank. The institution, erected via an alliance between the Banco Industrial de Venezuela and Iran’s Development and Export Bank, was established “with the aim of supporting joint economic, industrial and mining projects as well as speeding up the current projects” between Tehran and Caracas, Iranian state media reported.
The depths of Iran’s involvement in the Western Hemisphere are all the more surprising—and significant—given that there is no historical or cultural affinity whatsoever between Iran and the countries on this side of the Atlantic. Nevertheless, the Iranian regime in recent years has exhibited an unprecedented level of interest and involvement in the region, facilitated by its burgeoning strategic partnership with Caracas.

This economic activism serves several clear strategic purposes for the Iranian regime. First, it allows Tehran to circumvent financial sanctions imposed by the United States, the European Union and the United Nations through the use of the Venezuelan financial system. In doing so, Iran is exploiting an existing loophole in the application of U.S. economic penalties. To date, the U.S. Treasury Department has sanctioned several Iranian banks and various individuals. So far, however, it has not imposed similar restrictions on any Venezuelan banks. As a result, Iran’s partnership with Venezuela effectively provides it with an ancillary avenue through which it can access the international financial system despite Western pressure.

The second purpose is to facilitate the funding of radical organizations and guerrilla movements in the Hemisphere. This includes, first and foremost, Hezbollah, the radical Lebanese militia that serves as Iran’s principal terrorist proxy. Over the past three decades, the Iranian regime has facilitated the establishment by Hezbollah of a major regional presence throughout the Americas, and aided and abetted the organization’s involvement in a range of illicit activities, from drug trafficking to money laundering. (In 2008, for example, the Bush Administration accused Venezuelan diplomat Ghazi Nasr al Din and Venezuelan-Arab businessman Fawzi Kanan of laundering money as well as facilitating the travel of Hezbollah members from Iran to Venezuela.) In the last few years, scholarly analysis has also revealed the use of radical mosques in Caracas and elsewhere in Venezuela as a hub for Hezbollah fundraising activities, and more notably the existence of Hezbollah “support cells” on Margarita Island. Hezbollah likewise is...
known to have opened numerous military camps inside Venezuela, as well as in South Lebanon, with the express purpose of training young Venezuelans to attack American targets.7

Iranian sponsorship is not limited to Hezbollah, however; Hamas and even al-Qaeda have also benefited from Iranian/Venezuelan sponsorship, especially in fundraising from the Islamic communities in various regional states.8 Locally, Iran has also aided the Colombian FARC guerillas through the provision of arms and training in both Iran and Syria, conducted by the Iranian Revolutionary Guard Corps and its elite paramilitary unit, the Quds Force.9

Finally, these linkages establish the economic framework necessary for Iran’s geopolitical expansion into the region, and its investment in several key strategic sectors. These include:

Industrial and mining
The Iranian regime has acquired various “industrial” installations throughout Venezuelan territory, including a “tractor” factory in Bolivar state, a “cement” plant in Monagas, a car assembly plant in Aragua, and a bicycle factory in Cojedes.10 In reality, at least some of these installations have been identified as having been used for illicit purposes (such as the storage of drugs, weapons, and other items) beneficial to Iran and its client organizations, particularly Hamas and Hezbollah.11 In addition, the Islamic Republic has secured control of a gold mine in Bolivar state which is reported to also produce uranium.12 Extensive tuna processing facilities, corn processing plants and a dairy products plant have been purchased by Iran in Sucre, Barinas, Yaracuy, Guárico and Zulia.13

Transportation
Since the Venezuelan government now controls all of the country’s airports and ports, there is no way of knowing what is entering or leaving the country other than what the government itself discloses. Nevertheless, certain telltale activities relating to the burgeoning Iranian-Venezuelan relationship can be observed. They include:

- Weekly flights connecting Caracas and Tehran, stopping in Damascus. These flights, which are alternately Conviasa and IranAir flights, although ostensibly commercial, accept no commercial passengers or freight and land and unload official passengers and cargo without any immigration or customs controls.14
- Illicit shipping of armaments and other prohibited goods. On December 30, 2008, for example, Turkish authorities intercepted 22 containers marked “tractor parts” in the port of Mersin—a shipment that in fact contained materials for making bombs and other weapons, bound from Iran to Venezuela.15 The Iranian shipping line (IRISL) was subsequently blacklisted by the U.S. government, which caused the Iranian government to form dozens of new shell companies to circumvent the sanctions (many of which have been sanctioned in turn).

Energy
Cooperation in energy lies at the heart of the economic ties between Caracas and Tehran. The Venezuelan state oil company PDVSA and Iranian state oil company PetroPars, for example, have formed a joint venture for the exploration of a block in Anzoategui state.16 Likewise, the Venezuelan petrochemical company PEQUIVEN and the National Petrochemical Company of Iran have formed a joint venture to manufacture plastics in Zulia state and construct a new petrochemical plant in Iran, supposedly with Venezuelan technical advice.17 Most significantly, Venezuela has announced that it will ignore international sanctions and supply Iran with gasoline—a move that weakens U.S. efforts to pressure Iran by leveraging its deep dependence on foreign refined petroleum.18

Drug Trafficking

Iranian involvement in drug trafficking through Venezuela to Central America, Mexico, the U.S., the Caribbean, and to Europe through West Africa, is both extensive and well-documented. The proceeds of this illicit trade are used to finance further penetration of Iranian interests into the region, as well as to at least partially fund the terrorist organizations mentioned above. Detailed Drug Enforcement Agency and United Nations studies have reported on the extensive drug trade from eastern Venezuela to West Africa, and then onward to Europe. Supply for this pipeline is believed to come from Iranian installations in the delta of the Orinoco River, where “tuna” boats and other vessels load cocaine from Iranian installations and then sent upstream. Other narcotics routes through Venezuela similarly channel cocaine via Santo Domingo (Haiti and the Dominican Republic) to the Gulf Coast of the United States and the west coast of Florida. Cocaine is also flown or shipped through Central America, particularly Honduras and Guatemala, into Mexico and the U.S. Protection of the drug trade by the Venezuelan National Guard is so prevalent and notorious the Guard is sometimes referred to as an additional drug cartel (Cartel de los Soles, after the National Guard insignia of rank).

BRANCHING OUT BEYOND VENEZUELA

Iran’s activities in Latin America are most robust in Venezuela and its immediate neighborhood. However, Iran also boasts a complex web of activities (both political and illicit) throughout the Americas. Recent activities include:

- The opening of a branch of the Iranian Development and Export Bank in Quito, Ecuador.
- The opening of Iranian embassies in Nicaragua, Ecuador and Bolivia.

The Nicaraguan embassy in particular is known to serve as the base for Iranian activities in the rest of Central America and Panama, and its “diplomats” are believed to be primarily intelligence agents and agents of influence operating in the subregion.

- The construction of numerous warehouses for drugs, masked as legitimate construction businesses, throughout Central America.

In addition, there are Iranian projects for ports in Nicaragua, petrochemical facilities in Ecuador, and a cement plant and uranium exploration and mining in Bolivia. In November of 2009, an Iranian delegation visited Brazil, to “strengthen economic and cultural ties” with that country, and several economic agreements—some of which would appear to violate international sanctions imposed on Iran—were signed.

Frequent visits by Iranian government officials to various countries in Latin
America and visits by Latin officials to Tehran in the past two years have resulted in a large number of other agreements and projects. These have included the take-over of a Canadian mining concession in Guyana; the provision of a $250 million loan to Bolivia for the construction of one dairy and multiple industrial plants, as well as an expansion of radio-communications coverage of the country for the government. In return, Iran has been granted extensive mining exploration and exploitation rights by the Bolivian government.

Iran’s activities in Latin America are most robust in Venezuela and its immediate neighborhood. However, Iran also boasts a complex web of activities (both political and illicit) throughout the Americas. However, it is gradually becoming obvious throughout the continent that many of Iran’s promises over the years, such as the construction of a Caribbean port in Nicaragua, 10,000 houses in Venezuela and refinery installations in various countries, simply have not materialized. This has not noticeably affected relations between Iran and the countries in question, however, since these relations are primarily ideological. The exception to this rule is Venezuela, where substantial Iranian investments have in fact been made in a variety of economic and industrial sectors.

FORMULATING A RESPONSE
Over the past several years, Iran’s thriving relationship with Venezuela—and its further expansion from there into the region—has succeeded in catching the attention of policymakers in Washington. So far, however, little by way of concrete responses has emerged to counter the extensive web of illicit activity and strategic connections that Iran has made in Venezuela and throughout Latin America.

Responding to this threat requires the United States and allied governments to complicate Iranian access to the Americas, and penalize those involved in facilitating Tehran’s intrusion. This includes measures such as the designation of certain Venezuelan banks and affiliates by the U.S. Treasury Department and other agencies for their role in facilitating Iranian illicit activity, and even the outright declaration of Venezuela as a state sponsor of terrorism—a move that would open the door for the U.S. to take more direct and punitive
action against the Chavez regime for its collusion with both Iran and Hezbollah. This potentially includes a boycott of Venezuelan oil exports to the United States; for the U.S, these deliveries (currently only some 850,000 barrels daily) could easily be made up with equivalent amounts released from the U.S. Strategic Petroleum Reserve. By contrast, such a move would have a much more pronounced impact on the Venezuelan economy.

Closer monitoring of Iranian activities in the Hemisphere, and an expansion of intelligence resources throughout Latin America, is also necessary to better understand—and track—the Iranian regime’s regional presence. This includes maritime patrols of the mouth of the Orinoco River designed to complicate and disrupt existing trafficking routes currently being utilized by Iran.

Such steps should be implemented without delay. For it has become abundantly clear that Iran’s penetration into the region, and Venezuela’s facilitation of it, represents a real—and growing—security threat to the United States, as well as to the rest of the Hemisphere.
